UltraWide QHD LED monitor

Clearer, sharper images in full high-definition color. Acer monitors brings users into a perfect colorful world in UltraWide QHD 3440 x 1440, and provides the finest natural and sharp original quality 100,000,000:1 contrast ratio.

AMD Radeon FreeSync

With AMD Radeon FreeSync, the game's frame rate is determined by your graphics card, not the fixed refresh rate of the monitor. This means the monitor's frames are synced with the graphics card's frames, which eliminates screen tearing and delivers very smooth gaming experiences.

ZeroFrame Design

The zero-frame design maximizes its viewing area and provides a more seamless viewing experience for multi-monitor setups.

VESA certified Display HDR 400

DisplayHDR 400 requires only 400 nits and provides 95% BT.709 color gamut, it can also deliver the adjustment of full color gamut and supports HDR10.
